Natural gas, America's most popular home heating fuel, is increasingly popular for use by homeowners, schools, businesses, factories and electric power-generation plants because it is efficient, clean, reliable and a relative bargain compared to alternative energy sources.

In our community, the *City of Grantville* provides natural gas to more than **600** customers through a network of underground distribution lines. Main gas lines, typically 2-inch in diameter, branch into household service lines which are typically $\frac{1}{2}$ " – $\frac{3}{4}$ " in diameter and buried 12 – 18 inches below the surface. The service lines end at each customer's meter where gas is delivered.

To protect you and others in the community; federal and state government, along with your utility provider have made your safety a high priority. Any time you dig or move earth in any way, you are required to "Call Before You Dig" 48 hours before beginning any digging. When you call **811**, they will contact utility owners who will locate all buried utility lines on your property, so you can safely dig and prevent a potentially hazardous condition. Failure to use the **811** system is a known cause of pipeline accidents. Calling before you dig can prevent a costly or even deadly mistake.

Natural gas is a colorless, odorless gas; however, a chemical that smells like rotten eggs is added to help detect a possible leak. Some of the signs of a gas leak include seeing bubbling water, hearing a hissing or blowing sound from a pipeline or appliance, dead or discolored vegetation in an otherwise green area, dirt or dust blowing from the ground, or the smell of rotten eggs.

If you smell gas, or just think you might have a gas leak, **leave** the area immediately and call *City of Grantville* at **770-583-2289** or **911** from a neighboring home or business. **Never** turn on or off switches, open or close garage doors, use a flashlight or phone/cellphone in the presence of the gas smell, as these devices may be a source of ignition, causing an explosion.

Do your part to familiarize yourself and your family with these natural gas safety tips and continue to enjoy the value, comfort and benefits of America's cleanest, most efficient energy source!
